

Essential Persons (PCL Team Members, and Visitors)

Admittance to the Home

To be posted on the front door or inside the home next to the front door

PCL recognizes that visits and relationships are important for the people we serve. However, effectively immediately and for the foreseeable future, the following is being implemented. Per ODDS transmittal APD-PT-20-028, only the following people are allowed inside the home after successfully completing screening and **no more than 2 people who do not live or work in the home at a time**. Any areas of the home where visitors spent time must be cleaned immediately afterward.

- PCL DSPs and Employees who provide direct care, and prospective staff seeking employment
- Emergency Personnel
- Child and Adult Protective Services
- Long Term Care Ombudsman and Deputies (not volunteers)
- Office of State Guardian and other guardians when they have concerns about the health and safety of someone we support
- Licensing staff and Case Managers
- Friends or family during end-of-life stages
- Office of Training, Investigations, and Safety (OTIS) staff or delegates
- Outside medical and behavioral health personnel, including nursing service providers
- Behavior professionals, when necessary for health and safety and telecommunications methods are insufficient
- Vendors for critical supplies
- Family members
- Oregon Public Guardians (OPG) and other Guardians
- Close, personal friends

We will do everything possible to offer alternative means of communication through virtual methods (Skype, Google Hangouts, Facetime, etc.), cards, phone calls, etc).

Screening Questions

These screening questions must be answered prior to entering the home as well as an **understanding you must wear a face covering when within 6 feet of someone we support unless there is documentation with alternative instruction**. If you answer **yes** to any of the following questions, you **will not** be allowed to enter the home and an alternative means of communicating will be identified (virtual, phone, etc.)

1. Have you had signs or symptoms of a respiratory infection, such as fever, cough, shortness of breath, sore throat, or abdominal pain including nausea or diarrhea, not related to allergies or other known causes?
2. Have you had contact in the last 14 days with someone with a confirmed diagnosis of COVID-19, or under investigation for COVID-19 outside of the providers agency or home?
3. Have you been quarantined by public health or been advised to self-isolate by a physician within the last 14 days?
4. Have you traveled internationally within the last 14 days to countries with sustained community transmission as listed on the CDC website.

Upon successful screening, EVERYONE who enters the home at any time, including those who live there, must do the following:

- Wash hands for 20 seconds with soap upon entering the home and frequently while inside
- Wear a face covering, maintain 6 feet of distance when possible
- Use good respiratory etiquette, cover cough and sneezes in the elbow
